Milwaukee

414.297.4975

Dixon Seymour brings a passion for engineering and hands-on project experience to his role assisting innovators in protecting their unique ideas and inventions.

During Dixon's time as a biomedical engineering student, he gained real-world experience as an intern providing advanced technical solutions at a leading manufacturer specializing in critical environment airflow and monitoring systems for the life sciences industry. His responsibilities included sensor testing and documentation to help ensure system reliability and precision.

Dixon also has experience testing new leak detection technology and developing an alarmed leak detection system as an intern for North America's largest manufacturer and marketer of water heaters.

Practice Areas

- [Mechanical & Electromechanical Technologies](#)

Education

- Milwaukee School of Engineering (B.S., 2024)
 - Biomedical engineering
